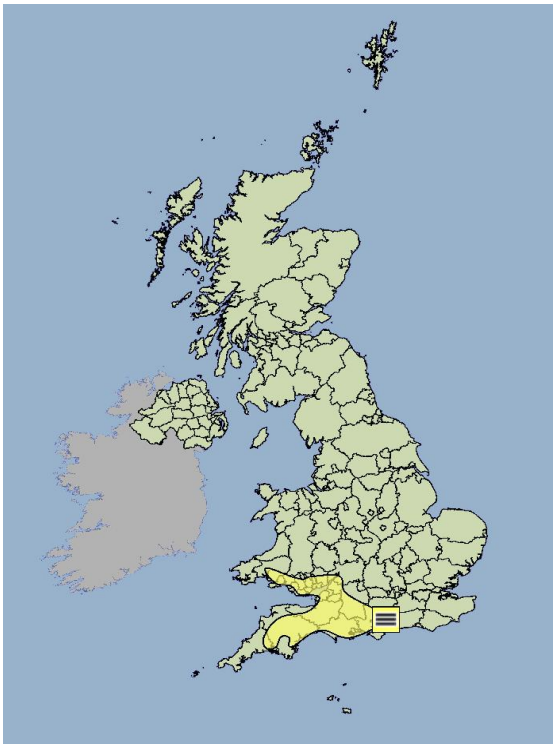
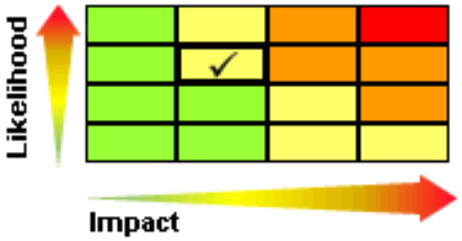
National Severe Weather Warning Service





Chief Forecasters Assessment
With little cloud and practically no wind, fog looks like thickening up pretty quickly this evening across parts of the warning area. The advance of cloud from the Midlands may help clear the fog before morning across the north and east of the area, although this aspect is uncertain.

The Met Office have issued a **Yellow Warning** of **Fog**

Valid from **16:00 on Thu, 01st Dec 2016** until **10:00 on Fri, 02nd Dec 2016**

Areas of fog, which have not cleared in some areas during Thursday, will become thicker and more extensive this evening. Patches of dense, freezing fog will then affect some areas through the rest of the night, although probably more restricted to parts of southwest England by Friday morning.

Please be aware of likely tricky road travel conditions.
